

INFORMATION REQUIRED FOR FILING AN INDUSTRIAL DESIGN APPLICATION

In this sheet we summarize the information we need for preparing and filing an industrial design application. This data will contribute to a well drafted application that will help you obtain the ultimate and best protection possible.

It is for that reason that it is so important that you answer all the sections in a clear, short and precise manner. It is essential that we can understand without a doubt the purpose, construction and operation of your designs. Furthermore, if possible, it would be convenient, if you could provide samples, layout, photographs and/or technical drawings of the design to be registered.

I. TITLE OF THE DESIGN

*In this section you must clarify, in a clear and concise manner, what is the **title/name/purpose of the design**. It is of special importance to point out that the title ought to be only descriptive and it must not include fantasy names.*

II. DETAILED DESCRIPTION OF THE DESIGN

*In this section it is necessary to **detail the most specific features of the elements, components** incorporated in **all the variants and perspectives of the design to be registered**. Likewise, it is convenient to indicate what use will be given to the aforementioned purpose/s and feature/s, of the design or variants thereof.*

III. GRAPHIC REPRESENTATION OF THE DESIGN

*The drawings should be **made in consistent lines and strokes**, thick enough and well delimited, **without colors or "shading"**. They should be comprised of different perspectives (longitudinal, overhead, front, back...). Designs with multiple elements or components, individual representations of each element and component must be supplied, included their corresponding perspectives. Photographs are accepted.*
